

Broadcast Sheet Decoder

This page is here to help you along deciding if the equipment and options are the "factory options" slated for your vehicle at production time. I know I don't have them all, but I have always seemed to decipher all my codes with what I do have. The codes listed below are good for 1969-1983 also 1962-1968. They are listed in sections. Have your build sheet or broadcast sheet available, or if you don't have that, the tag on the drivers side fender top, in the engine compartment will have a lot of the codes for engine and body options. You should be able to figure out all your factory options with this chart if you don't see a chart blame the browser not me, you should still be able to find your codes okay.
